

# ABOUT US

At Jobsbridge Institute (division of Agile Datapro – USA), besides other Data Science, AI-ML courses, we offer our an integrated 12-week program that combines applied learning with an internship. The program is designed to train students with Data, Cloud Computing and Analytics skills combined with hands-on experience needed to succeed in today’s fast-paced world of technology. Uniquely, our program includes a Microsoft certification and hands-on experience working in Azure cloud environment, providing students with a deeper connection with the current tech industry. Our program culminates in a job readiness and placement phase designed to help students fully transition into the workforce.

## Institute of Applied Learning & Job Readiness

.....  
**USA – INDIA – BANGLADESH**

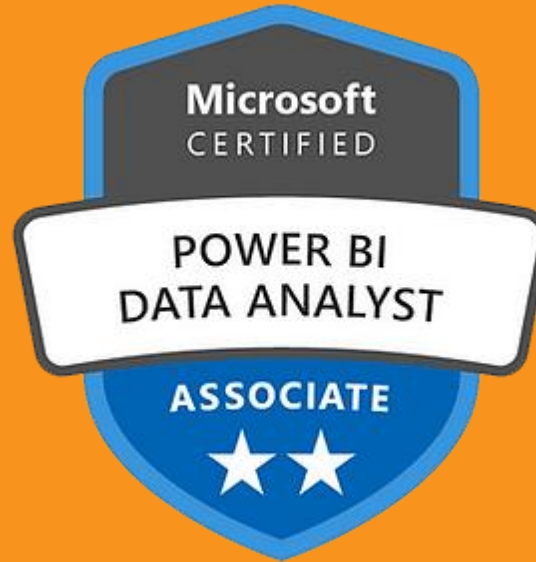

1875 S. Winchester Blvd  
Campbell, California, USA

## Applied Internship Program

Our immersive internship program, tailored for engineers and data science and analytics enthusiasts, enables candidates to master data analysis essentials, data visualization in the Azure cloud environment, all while tackling real-world problems in the form of an Industry Use case-based Capstone Project. Participants will work with real-life datasets and create Power BI dashboards to hone their analytical skills. They will explore how these technologies are transforming science and industry through practical use cases. Students will present their projects, demonstrating their abilities and skills, and preparing themselves for future careers. This program sets candidates on a lifelong learning journey, equipping them with the tools and knowledge to stay abreast of scientific and technological innovations.

## Microsoft PL – 300 Certification

### COURSE DETAILS
